

The H2H Network is accelerating humanitarian innovation

Humanitarian needs have never been higher. Innovation is essential, both to meet today's challenges and to prepare for those on the horizon. The H2H (humanitarian-to-humanitarian) Network has activated its fund mechanism to support members in developing new services aiming at unlocking change and driving improvements across the wider humanitarian system.

Three H2H Members will receive financial support and guidance on how to bring their innovations to scale. Projects include a data hosting system that enables the simple and effective management of multiple datasets, an initiative supporting humanitarian actors to adapt their interventions to the climate crisis, and a tool supporting localized production and procurement in humanitarian action.

H2H organisations have always been at the forefront of efforts to improve the system, driving innovation and demonstrating new possibilities. Building on this knowledge and experience, this programme will prioritise new partnerships within and beyond the H2H membership and create novel combinations of skills, approaches and technologies.

This H2H Accelerator Programme is made possible by the generous support of the American people through the United States Agency for International Development (USAID).

H2H Network Accelerator

Who?	What?	Contact
Groupe URD	Developing solutions to enhance the impact and implementation of their climate and humanitarian crisis initiative dedicated to improving preparedness and response to environmental related disasters.	Véronique de Geoffroy , vdegeoffroy@urd.org Paul Knox Clarke , pknoxclarke@gmail.com
Humanitarian Logistics Association	Developing a new tool to enable aid agencies to better support local markets and businesses through a local procurement learning framework.	George Fenton , george.fenton@humanitarianlogistics.org
Relief Application	Developing a data management solution to offer an application builder to enable humanitarian organisations to manage the whole data cycle with only one integrative tool.	Julio Melon , julio@reliefapplications.org Cecilia Pana , cecilia@reliefapplications.org

The H2H Network

Getting more to people in need

The H2H Network brings together nearly 60 high-quality, independent humanitarian service providers and change agents who enable efficient, impactful and accountable aid during a crisis by facilitating and resourcing humanitarian-to-humanitarian (H2H) services for the wider system.

These independent, cross-cutting services are well-suited to address many of the gaps and challenges that continue to hamper humanitarian action in specific emergencies. Together, these organisations are leading efforts to reform and improve the global humanitarian response.

The H2H Network supports its members by enabling collaboration, fostering community, and allocating resources. In response to crises, we activate and disburse funds quickly to meet specific needs in the wider humanitarian system, as well as identify and create synergies between our members to ensure collaboration.
